CONCRETE FLOWER POTS

FROST-RESISTANT, INSULATED AND REINFORCED
POTS MADE FROM ARCHITECTURAL CONCRETE

A pot made from architectural concrete will be perfect in a modern arrangement, it will emphasize the charm of plants, grasses and shrubs. Thanks to cubist shapes, it is easy to obtain a modern, monochrome and unique effect.

The pots can be used outdoors as they are frost-resistant. Their high durability is due to the double reinforcement and the wall thickness of 5.5 - 6 cm (depending on the model).

The bottom and walls of the pot have a 2 cm insulation made of styrodur, which protects plants from cold. The pots are secured against the leakage of moisture.

Thanks to waterproofing, they can be placed inside directly on the floor (no additional tray is needed), without fear of damaging the floor.
