

CULTURE TUB

CULTIVATION INSERT

DISCOVER BENEFITS
OF THE CULTURE TUB

W600/1 W800/1

CULTIVATION INSERT **CULTURE TUB**

Change of plantings without dismantling the whole construction!

What and how?

It is a special plant container, which makes it possible to change plantings without disassembling the decoration – fast and without any complicated works.

Check what you can gain:

1. SAVE WORKING TIME

Less operating hours for assembly and disassembly of plantings

2. NO DAMAGE TO THE CONTAINER

The hanging Flower Tower stays on a lamp. Just change a culture tub for new one, full of flowers

Culture Tub is equipped with an overflow hole system, preventing rotting of plants due to excess water, (for example after heavy rain).

WITH CULTURE TUB YOU WILL PLANT A STREET LAMP IN **60 SECONDS!**

HANGING FLOWER TOWER W800/1

Culture Tub is made of polypropylene - a material extremely resistant to any damage, and at the same time ecological, because obtained through recycling. It's an idea for building the image of an environmentally friendly city.

CHANGING OF PLANTINGS **HAS NEVER BEEN EASIER!**

IMMEDIATE VISUAL 3. EFFECT

Changing the flowering takes a few moments, the flowers in the new insert are in full bloom right away

NO NEED
TO DISASSEMBLY
THE CONTAINER
ALL YEAR
ROUND

NO CONTAINER STORAGE 4.

While changing the insert, you do not have to disassembly the whole container and store it. Just change the planted insert

SAVING ON SERVICE 5.

Possible damage while planting can happen only to the insert, which is much cheaper than the hanging Flower Tower itself

BETTER GROWING CONDITIONS FOR 6. PLANTS AND THEIR BEAUTIFUL LOOK

Double wall are an insulator - the soil in the container does not heat up so quickly

FIND OUT **HOW SIMPLE IT IS**

1.

Spring Flowers

Will you choose pansies or daisies?
Remember that spring plantings start
already in March!

2.

Summer Flowers

After the flowering period of spring
specimens, remove the insert with plants
and replace it with a previously
prepared summer composition. Surfinia
and geranium are a sure choice for your
city.

3.

Autumn planting

In autumn, street lamps in your city can also flourish ... and in a blink of an eye! In this period of the year replace the insert with fading summer plants with a previously prepared heather insert.

4.

Winter time

Remember that in winter you do not have to disassemble the hanging Flower Towers. All you need to do is cover them with a Christmas Spruce Cover. You gain a Christmas decoration, and at the same time, you protect the container, saving costs and space for its traditional storage.

(...) Their construction takes into account the needs of plants, allows drainage of water excess and accumulating it during rainless periods of time - comparing to ordinary containers fixed on street lamps, differences are particularly noticeable in terms of watering. Thanks to the double bottom system, flowers have an access to water and thanks to it, they bloom longer, creating a colorful scenery. Easy assembly and disassembly of Culture Tubs is also the thing of a great importance to us.

Anna Sochacka, deputy mayor of Siedlce (2010 - 2014)
