

The Flower Towers  
on street lamps in your city

The main square - the heart of the city

## W600/3

Vast squares of the towns and cities are usually areas dedicated to pedestrians in which social life is centered and historic buildings are combined with the modern ones.

In these unique, characteristic surroundings greenery is a must, even if there is no natural substrate.

### Technical Data:

Metal Flower Tower, laser cut, hot-dip galvanized steel covered with powder coating.

|   |                             |                 |
|---|-----------------------------|-----------------|
|    | Number of Rings             | ▶ 3             |
|    | Volume                      | ▶ 2 x 35 l      |
|    | Total Height                | ▶ 550 mm        |
|    | Diameter of the Bottom Ring | ▶ 600 mm        |
|    | Weight Before Planting      | ▶ 2 x 9 kg      |
|   | Weight After Planting       | ▶ 2 x 22-45 kg  |
|  | Average Number of Plants    | ▶ 2 x 10-14 pcs |

# W600/2

Sidewalks and pavements are an inherent part of every urban space.

They play the role of the arteries which connect the most distant corners of the city assuring safe and comfortable pedestrian flow. Usually, it is covered by cobblestones which is the factor eliminating greenery. However, we found the solution to create green oases in such places too.

Sometimes pavements are so narrow that except the street lamps there is no space for any additional elements.

## Pavement - main artery

Bełchatów

## Fountain - an oasis in the center

## W600/2

Water is not only music to our ears but also it is a moisturizer and air ionizer beneficial for people and all living organisms. So how to arrange the space around the fountain? It's easy! Take advantage of the Flower Towers fixed on the poles such as street lamps which will illuminate water or the square.

The Hanging Flower Towers W600 will be appropriate in the place where the given surface does not allow to launch bigger standing models.

## Pedestrian area - a walk among flowers

## W600/1

Undoubtedly, the pedestrian area decorated with flowers gives an aesthetic value to the cities. The main promenades and streets can be even more visible thanks to the flower decorations on the city lamps. Colorful baskets over the heads of passers-by are a safe solution which does not disturb the pedestrian flow and makes the area open and friendly.
