

## TERRA CHRISTMAS

NEW

### 2D & 3D Christmas decorations

Colorful baubles, Christmas trees in a 2D or 3D version are unique decorations that will make the atmosphere of Christmas even more noticeable. Thanks to their simple structure and high resistance to damage, they will work even in the most difficult conditions.

Colorful Christmas balls in the 2D version are standing decorations made of printed Dibond plate connected with each other by a frame, which is mounted on a rack that can be fixed to the ground. Thanks to this, the decoration can also be placed outside. Easy installation and high resistance to damage are additional advantages of the product.

Christmas ball 3D  
(2x Dibond 3mm)

If outside, the 3D ball has a mast in a rack structure

A 3D Christmas ball can also remain without a rack  
- on its own, then it has a cut base

Colorful Christmas balls in the 3D version are standing decorations made of printed Dibond boards. They can become independent elements or can be mounted on a rack with the possibility of being fixed to the ground. We suggest using the Christmas ball without fixing only inside. Easy installation and high resistance to damage are additional advantages of the product.
