

URBAN FURNITURE COLLECTION

URBANA

URBANA

Furniture For Urban Jungle

Classical solutions on an urban scale. The Urbana Collection is a line of modular elements for public spaces. A bench, pot, tourist information stand or bicycle rack can be presented as individual elements, but also they can create a coherent composition in the space or become its main accent. Their high weight means that there is no need of fixing the furniture to the ground and the effect is immediate without any construction works. Steel used in the production process of the Urbana Collection guarantees that the decorations resist severe weather conditions but also acts of vandalism. They are solid, aesthetic and functional solutions for years.
