

PRICE LIST  
2021

---

## Do not buy a pig in a poke...

The price list in your hand is an integral part of the Terraform Catalogue. It is clear and informative, which makes the acquaintance with our offer more accessible. All technical data has been divided according to the collections, using the same sequence that was used in the catalogue.

Product data has been presented in understandable modules, each of them containing:

- the name of the product and the manufacturer
- technical drawing with a marked planting liner
- list of basic colors, or, depending on the model, lacquer's colors and colors of the pots in the LIGHT version
- list of materials that have been used in the production
- a table with the name of the model and product's code, its size and price

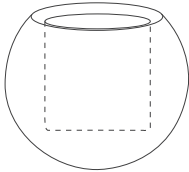

Select your product - check the price The basis price of each product can be found in the column PRICE\*. It applies to products in basic colors that can be found on the list above the table. You can freely choose from the presented colors. Price of the products in basic colors is always the same. Depending on the model, you can also opt for a lacquered version of the selected pot or its luminous equivalent. The price can be found in the column labeled as PRICE\*\*. To create a code for a specific product, just add the code given in the table to the code of the selected color.

The background features several overlapping, dashed grey lines that form a large, irregular shape resembling a globe or a stylized letter 'G'. The lines are thin and spaced out, creating a light, airy feel.
